

**The University of Jordan  
School of Engineering**

| Department             | Course Name       | Course Number | Semester |
|------------------------|-------------------|---------------|----------|
| Mechanical Engineering | Fluid Mechanics I | 0904361       |          |

**2019 Course Catalog Description**

Introduction, Fluid properties, Basic units. Fluid statics, Pressure and its measurements, Forces on plane and curved submerged surfaces, buoyancy & stability, Fluids in motion, Flow kinematics and visualization, Basic control volume approach, Differential and integral continuity equation. Pressure variation in flowing fluids, Euler's and Bernoulli's equations, Applications of Bernoulli equation. Momentum equation and its applications, Energy equation, Hydraulic and energy grade lines. Dimensional analysis and similitude. Flow in conduits, laminar and turbulent flows, Frictional and minor losses, Piping systems, Pumps, Concept of Hydraulic jump.

**Instructors**

| Name | E-mail | Sec | Office Hours |  | Lecture Time |  |

**Prerequisites**

|                                |  |
|--------------------------------|--|
| <b>Prerequisites by topic</b>  | -  |
| <b>Prerequisites by course</b> | Engineering math. (2) 033130 + Dynamics 0904222  |
| <b>Co-requisites by course</b> | -  |
| <b>Prerequisite for</b>        | <ol style="list-style-type: none"> <li>1. Fluid mechanics lab</li> <li>2. Fluid mechanics (2)</li> <li>3. Heat transfer (1)</li> <li>4. Engineering Measurements</li> <li>5. Design of Hydraulic and Pneumatic Systems</li> <li>6. Design of sanitary systems</li> <li>7. Turbomachinery</li> <li>8. Introduction to Flight Mechanics</li> </ol> |

**Topics Covered**

| Week | Topics           | Chapter in Text | Sections   |
|------|------------------|-----------------|--|
| 1, 2 | Fluid properties | Chapters 1&2    | 1.1 ,1.2, 1.3, 1.4, 1.5, 1.6, 1.8, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8, 2.9, 2.10 |

|         |   |            |   |
|---------|---|------------|---|
| 3, 4, 5 | Fluid statics                                   | Chapter 3  | 3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7                           |
| 6, 7    | Flowing fluids and pressure variation           | Chapter 4  | 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.11           |
| 8       | Control volume approach and Continuity equation | Chapter 5  | 5.1, 5.2, 5.3, 5.4, 5.5                                     |
| 9       | Momentum equation                               | Chapter 6  | 6.1, 6.2, 6.3, 6.4, 6.6                                     |
| 10      | Energy Equation                                 | Chapter 7  | 7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 7.7, 7.8                      |
| 11      | Dimensional analysis and similitude             | Chapter 8  | 8.1, 8.2, 8.3, 8.4, 8.5, 8.6, 8.7                           |
| 12-15   | Flow in conduits                                | Chapter 10 | 10.1, 10.2, 10.3, 10.4, 10.5, 10.6, 10.7, 10.8, 10.9, 10.10 |

### Mapping of Course Outcomes to ABET Student Outcomes

| SOs | Course Outcomes   |
|-----|---|
| 1   | 1. Ability to analyze hydrostatic loading problems<br>2. Study flowing fluids and pressure variation<br>3. Understanding the analytical and empirical formulations for flows in conduits and calculate losses in pipe systems<br>4. Applications of mass, momentum and energy conservation laws to fluid mechanics problems<br>5. Applications of dimensional analysis and dynamic similitude to fluid mechanics problems |

### Evaluation

| Assessment Tools | Expected Due Date | Weight |
|------------------|-------------------|--------|
| Quizzes          |                   | 25 %   |
| Midterm Exam     |                   | 25 %   |
| Final Exam       |                   | 50 %   |

### Contribution of Course to Meet the Professional Components

The course contributes to building the fundamental basic concepts of fluid statics and motion analysis and basic fluid mechanical piping systems design.

### Relationship to Student Outcomes

| SOs          | 1 | 2 | 3 | 4 | 5 | 6 | 7 |

| Availability | X |   |   |   |   |   |   |

### ABET Student Outcomes (SOs)

|          |  |
|----------|--|
| <b>1</b> | An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics  |
| <b>2</b> | An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors                   |
| <b>3</b> | An ability to communicate effectively with a range of audiences  |
| <b>4</b> | An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts |
| <b>5</b> | An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives   |
| <b>6</b> | An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions  |
| <b>7</b> | An ability to acquire and apply new knowledge as needed, using appropriate learning strategies   |
